NovaBACKUP Business Essentials is an all-inclusive local and cloud backup and disaster recovery software for Windows Servers with support for SQL, Exchange, and Virtual Machines.

All-inclusive Server Backup with Unmatched Support

Local and Cloud Backup

Protect your Windows Server, VMs and database data locally and in the cloud with our NovaBACKUP Cloud storage option.

Automatic Backup Scheduling

Set up full, incremental or differential backup jobs to run automatically on a set schedule of your choice. Plus get automatic email notifications about your backup jobs.

Affordable Pricing

NovaBACKUP Business Essentials is affordably priced at **\$299.95 (MSRP) per year**. That's just \$24.99 a month to protect your Windows Server, SQL, Exchange and unlimited virtual machine data.

Setup Assistance Included. Unmatched Support

Get complementary one-on-one installation and setup assistance from local backup experts so your data is properly protected from day one. Our support is unmatched in the industry. Get knowledgeable, prompt support from experienced backup experts who care.

Windows Data Protection

Full protection of Windows systems, plus support for business applications including Microsoft SQL, Microsoft Exchange and support for virtual machines.

Backup and Disaster Recovery (BDR)

Your image backups can be directly mounted by a Hyper-V machine within minutes for physical to virtual recovery. Bring up a backup copy of a machine quickly if disaster strikes.

All-in-One Solution

Automated backups, email notifications, file and image backups, incremental, differential and copy, compression, encryption, bare metal restore, granular recovery, and built-in P2V. HIPAA, FERPA and GLBA compliant.
