#### ASK US ABOUT PRICING

Email us at [msp@novabackup.com](mailto:msp@novabackup.com)

NovaBACKUP Cloud is designed specifically for managed service providers seeking a single, easy-to-use local and cloud-based backup and data recovery solution.

### We have the tools your business needs to succeed

#### Cloud and Backup Monitoring

Keep track of all your customers' applications with Remote Central Monitoring and User Account Management. Stay one step ahead of ransomware and other data threats.

#### Local and Off-site Backup

Two cloud storage options (NovaBACKUP Hosted or self-hosted) plus unlimited local backup. Hardware agnostic.

#### Simple Billing with Flexible Licensing

NovaBACKUP Cloud for MSPs is account based, which means no need to track license keys. Plus, you pay only for the compressed cloud storage across all your client accounts.

#### Setup and Training Included. Unlimited Phone Support

NovaBACKUP Corporation is an MSP-friendly software provider. Our team has decades of experience in the MSP realm and offer a solution with predictable revenue growth.

#### Windows Data Protection

Full protection of Windows systems, plus support for virtual machines, Microsoft SQL and Exchange with Granular Recovery.

#### Backup and Disaster Recovery (BDR)

Your image backups can be directly mounted by a Hyper-V machine within minutes for physical to virtual recovery. Bring up a backup copy of a machine if disaster strikes.

#### All-in-One Solution

Automated backups, email notifications, file and image backups, incremental, differential and copy, compression, encryption, bare metal restore and built-in P2V. HIPAA, FERPA and GLBA compliant.
